

Introducing ENH500

Business Class 5GHz Outdoor Wireless N Long Range CB/AP

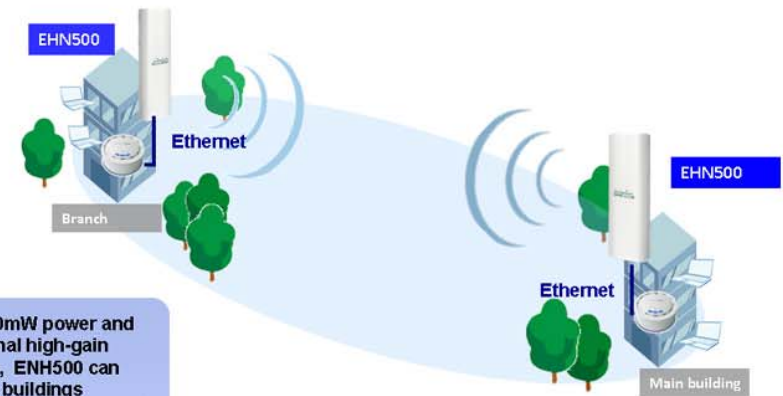

EnGenius ENH500 is a high power long range wireless Access point/bridge with 600mW power running on 5GHz band. It is a preferred solution for outdoor high speed wireless network projects need less interference to deliver a more stable connection for applications such as streaming video from IP video cameras.

Designed for outdoor application, the IP65 rated device is great for connect IP camera, outdoor digital signs.

Application - 1

Building-to-Building Wireless Connection

With 600mW power and directional high-gain antenna, ENH500 can link two buildings together with high speed connectivity in high 2.4GHz interference area

Application - 2

Outdoor IP Security Camera Connection

IP camera wireless connection

ENH500 is a great alternative for high 2.4GHz interference area. It provides stable video connection link

Application - 3

Outdoor Digital Signage Wireless Connection

Running on 5GHz, the ENH500 provides ultra stable wireless link perfect for outdoor digital sign with minimal interference
